

## Overview

There is only few differences:

- Contact template can be attached to contact but contact can't be attached to Contact Template.
- 2 properties of the Generic tabs are not present:
  - Display Name
  - Password

## Editing

Once you entered in the Contact Template page, you can manage (create, modify, duplicate, delete...) Contact Template is the same way than editing a host.  
(see [Contact](#) and [Create a contact](#))
