

# History Tab

## Description

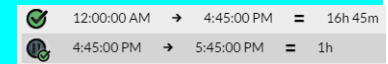

The history tab displays all status changes for the host, like "Last State Change" in **Hud**, but for entire host's life.

- On the left (1), the date
- On the right :
  - Top (2) : A summary of state changes for the day. Each status in % are represented with gauges.
  - Bottom (3) : A list of all status ranges for the day.

For each range :

In this detail list, context changes are also shown (flapping, acknowledge, downtime...)

Note that if there is only one range, the detail list is not displayed :
