

# User's Guide

**Innovative and powerful User Interface** with customizable dashboards.

*It offers an exhaustive and efficient vision of your IT.*

*This UI improves and simplifies your IT monitoring!*

This guide will provide you all the keys to understand the Shinken Enterprise's visualization UI and how to use it.

Let's do it step by step.

## Hive

How to customize your monitoring view:

- **Dashboards**: organize monitoring results
- **Widgets**: display monitoring results the way you want
- **Host Detail View**: know everything about an element ( host / cluster )

## Lists

Everything about elements presented in one list:

- **ALL**: hosts, checks, clusters, all in one!
- **Root Problems**: identify instantly elements to be fixed

## Walls

View your key business elements :

- **360**: 3D representation of your elements
- **Business Apps**: your priorities first !
- **Reporting**: SLA reports of your elements
