

Description

The history tab displays all status changes for the host, like "Last State Change" in [Hud](#), but for entire host's life.

- On the left (1), the date
- On the right :
 - Top (2) : A summary of state changes for the day. Each status in % are represented with gauges.
 - Bottom (3) : A list of all status ranges for the day.

For each range :	OK 12:00:00 AM → 4:45:00 PM = 16h 45m Status Start Time End Time = Duration
In this detail list, context changes are also shown (flapping, acknowledge, downtime...)	OK 12:00:00 AM → 4:45:00 PM = 16h 45m OK 4:45:00 PM → 5:45:00 PM = 1h
Note that if there is only one range, the detail list is not displayed :	06/09/15 Critical 100.00 % 05/09/15 Critical 100.00 %
