

# Collecteur synchronizer-collector-linker

Here are Improvements / Corrections in this release:

## Table of content

- [Introduction](#)
- [Fonctionnement](#)
- [Configuration \( affichage de la source dans la page d'accueil\)](#)
- [Utilisation du collecteur](#)
- [Précisions techniques](#)

| Visualization UI              |                             |   |
|-------------------------------|-----------------------------|---|
| <b>List ALL</b>               | Im<br>pro<br>ve<br>me<br>nt | <ul style="list-style-type: none"> <li>• In the left panel containing the Advanced filtering, when adding filter, "tag" label become "host template" and "son of" become "link to"</li> </ul>   |
|                               | Im<br>pro<br>ve<br>me<br>nt | <ul style="list-style-type: none"> <li>• The properties Description and Address are now available in the list.</li> </ul>    |
| <b>Detail panel</b>           | Ne<br>w<br>fea<br>ture      | <ul style="list-style-type: none"> <li>• Each host and check can be linked to an external URL (like a wiki page), which is defined in the Configuration UI.</li> <li>• A button has been added to open these externals URL               <ul style="list-style-type: none"> <li>◦ If the URL is defined the button is active</li> <li>◦ if not defined, the button is automatically un-active.</li> </ul> </li> <li>• For Host the button is located in the <b>Manage</b> tab.</li> <li>• For checks, the button it located in the column action (checks tab)</li> </ul>  |
|                               |                             |    |
|                               | Bug                         | <ul style="list-style-type: none"> <li>• In the Checks Tab, an output with a word to long (without space) was not well displayed.</li> </ul>  |
|                               | Bug                         | <ul style="list-style-type: none"> <li>• In Firefox, when the zoom is set to 100%, tabs were to big and a useless scroll was displayed. Tabs size is now adapting itself to the detail panel height.</li> </ul>   |
| <b>Wall: Reporting</b>        |                             | When choosing the element, the label "Host by tag" is replaced by "Hosts by host template"  |
|                               |                             |   |
| Configuration UI              |                             |   |
| <b>Auto Detection Modules</b> | Im<br>pro<br>ve<br>me<br>nt | If an Auto Detection Module can't be loaded, the state of the source is now in error in the home page (misspelling in the configuration file for example), previously in pending.   |

|   |              |   |
|---|--------------|---|
| <b>Auto detection Modules</b><br><i>[cfg-file-shinken or cfg-file-nagios]</i> | Improve ment | For a host, if the property Alias (Nagios usage) is defined but not the DisplayName (Shinken usage) , Display Name will automatically contain the Alias value.  |
| <b>Auto detection Modules</b> <i>[Active Directory]</i>                       | Bug          | The first host answered by the ldap command was not presents in the hosts' list proposed.   |
| <b>Element edit page</b>  | Improve ment | <ul style="list-style-type: none"> <li>for Host, Host template, check, check template, contact, contact template: <ul style="list-style-type: none"> <li>All properties of any levels of inheritance are displayed on an element (Only 2 levels were shown, since now)</li> <li>All Data of any levels of inheritance are displayed in data page of an element (Only 2 levels were shown, since now)</li> </ul> </li> </ul> |
|   | Improve ment | <ul style="list-style-type: none"> <li>In difference tab, current value is now in black, and the new value is in blue.<br/>The red previously used might lead the user to think there was an error.</li> </ul> <div style="text-align: center; background-color: #f0f0f0; padding: 5px; border: 1px solid #ccc;"> <span style="font-size: 24px; font-weight: bold;">?</span> Unknown Attachment </div>                      |
|   | Bug          | <ul style="list-style-type: none"> <li>When the user did accept differences on an element with the "Apply differences" button, the Menu "Apply changes" counter was not visually updated.</li> </ul>  |
| Host edit page  | Improve ment | All checks of any levels of inheritance are displayed in the tab Checks for a host (Only 2 levels were shown since now)   |
| Checks edit page  | Bug          | Checks with \$KEY\$ (related to feature "duplicate for each") can't be saved and were refused due to the \$ character.  |
| <b>Monitoring Packs</b>   |              |   |
| Pack printers   |              | Printer Host Template was using the "workhours" time period which was not present in the Shinken Enterprise Configuration provided during installation or update. It's now referring to "24x7" time period.   |
| Pack linux  |              | Linux SSH plugins were not compatible with the default debian8 OpenSSH encrypting configuration.  |
| Pack DNS  |              | The DNS sample check was looking at host DNS entry in system configured DNS servers instead of checking DNS server real availability.   |
