Overview

This list displays elements that need to be fixed.

The screenshot shows the Shinken monitoring interface. The top navigation bar includes the Shinken logo, a home button, a list button, a wall button, and an admin button. Below the navigation bar is a search and filter section with fields for 'Filter Host Name', 'Filter Check Name', and 'Filter Output'. The main content area is a table with the following columns: Icon, Type, Host, Check, Priority, Tags, Managed By, Context, Status, and Output. The table lists various hosts and checks, many of which are in a 'DOWN' or 'CRITICAL' state. The 'Status' column uses colored icons to indicate the state: a red 'X' for DOWN and a red 'X' with a lightning bolt for CRITICAL. The 'Output' column provides detailed error messages for each failed check.
