

Create bookmarks

 Important: Only a hive or a list can be bookmarked..

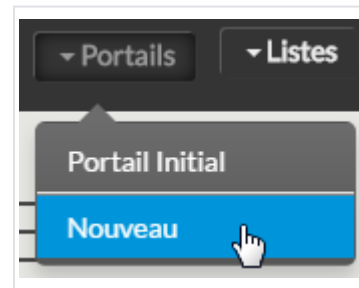

Hives

On a new hive

To create a new hive, click on the hive menu in the navigation bar and choose the "New" entry.

This action will :

- create a new view with a blank hive (default name 'New Hive').
- and automatically add a link to the new portal in your "Private" bookmarks section. ().

 Note that the "New hive" menu is not available if the user does not have write access to the "Private" area. (cf [EN - User rights on bookmark sharing](#))

Saving a new version of an existing hive (make a copy)

Go to the hive you want and click on "Add to favourites" of the [Navigation bar informations](#).

A pop-up form appears with the new name you want for this copy of the hive.

Validation of the form will:

- Create a new view with a portal that will be a clone of the current portal with the name entered in the form.
- and automatically add a link to the new portal in your "Private" bookmarks section. ().

Lists

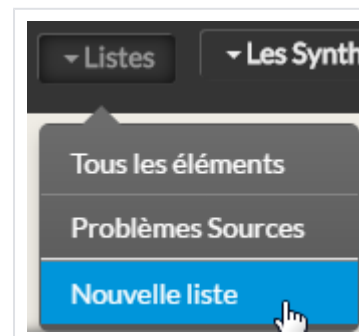

Create a new list

To create a new list, click on the "lists" menu in the navigation bar and choose the "New list" entry.

This action will :

- create a new view with a list configured to default settings (default name 'New list').
- and automatically add a link to the new list in your "Private" bookmarks section. ().

 Note that the "New list" menu is not available if the user does not have write access to the "Private" area. (cf [EN - User rights on bookmark sharing](#))

Saving a new version of an existing list (make a copy)

Go to the live you want and click on "Add to favourites" of the [Navigation bar informations](#).

A pop-up form appears with the new name you want for this copy of the list.

Validation of the form will:

- Create a new view with a list that will be a clone of the current list with the name typed in the form.
- and automatically add a link to the new list in your "Private" bookmarks section. (list  or root problems list )
