

Overview

In this view, you can easily see the list of all hosts and services.

? Unknown Attachment

1. **Quickly filter the list with typed values**
2. **Choose column data displayed or the number of lines displayed per page.**
3. **Refresh of the whole list.**
4. **Select elements.**
5. **Make a complex filter**

Quickly filter elements

On the top of the list, fields will allow you to filter this list:

There are 2 kinds of filters:

Text filter (like Host or Check columns): <ul style="list-style-type: none">Type some letters (from 1 to as many as you want)Press enterThe filtered list will display the lines containing your lettersTo remove the filter, select the typed text, delete it and press enter	? Unknown Attachment
List of values (like Priority or Status columns): <ul style="list-style-type: none">Click in the fieldThe list will display possible valuesSelect one of themThe filtered list will display the lines matching the selected value	? Unknown Attachment

Select displayed data column

? Unknown Attachment

A click on the gearing button

will open the following pop-up.

You can choose which column to display:

Column	Description
Priority (Business impact)	The importance of the element defined in the Shinken Enterprise configuration is represented by star (from 0 to 5), this view is sorted by business priority importance.
Realm	The Realm(s) to which the element belongs.
Host Templates	The Host Template(s) that the element uses.
Host Groups	The Host Group(s) to which the element belongs.

? Unknown Attachment

Service	The Checks name.
Contacts	The <i>short names</i> of the Contact(s) that should be notified whenever there are problems (or recoveries) with this element.
Link To	The elements linked to the element.
Context	Look at Status & Context page.
Status	Look at Status & Context page.
Confirmed	The current state is a Hard State (See Hard & Soft Logic)
Last Check	When did the previous check occur.
Attempts	Will be useful only if the state type of the element is SOFT. It indicates how many checks can be possibly done before the State type becomes HARD (more into Hard & Soft Logic).
Duration	Since when the element is in this state.
Is Root Problem	Element is the root cause of a problem.
Is Acknowledged	Current element status was acknowledged by someone.
In downtime	When the element is currently in downtime .
Output	The output string provided by the last plugin checking the element.

Refresh the list

If you don't make any action, the page will be refreshed every minutes

If you click a button or any element in the interface, a refresh will occur 60 seconds after the last action.

You can force a refresh using this button

Advanced Filtering

The filter panel can be opened by clicking on the left bar (Overview image : 4). In this menu, you will be able to stack "and/or rules".

"AND" filters are in a block

<p>By default, the following filters are defined</p> <ul style="list-style-type: none"> All status and properties are presents All status and properties of services are presents 	<p>? Unknown Attachment</p>
<p>You can select host matching status type.</p> <ol style="list-style-type: none"> Click on "all" text The pop-up showing all type appears Chose the states you want to keep 	<p>? Unknown Attachment</p>

<p>You can select host properties</p> <ol style="list-style-type: none"> 1. Click on "any" text 2. The pop-up showing all properties appears. 	
<p>To add other filters:</p> <ol style="list-style-type: none"> 1. Click on the "and" at the bottom of the filter box 2. A new line will be added. 3. Select the new filter 4. Select the type of comparaison. 5. Type the matching value. 	

ADD a new block to set a "OR" between two "AND" blocks

To add a block, click on the "OR" button.

Validate the filter

Simply click on Filter button.

In the list, you will see only elements matching the defined filter.
