

Menu

Main Menu

At the top of the page, you can see the **Main Menu**. This Menu is always available.

As shown on the image, this menu let you access to main configuration sections :

- [Home page](#) (Configuration overview and Automatic Detection module list).
- [Elements](#) (to manage Hosts, Services etc.).
- [To be applied](#) page (apply the Staging configuration to the Production environment).

Elements Menu

Elements Menu give the Administrator an easy access to each elements of the configuration that are used to build and maintain the monitoring system.

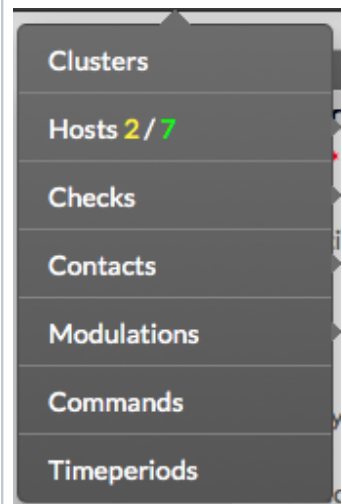

This menu provides the following access :

- Clusters
- Hosts
- Checks
- Contacts
- Modulations
- Commands
- Timeperiods

The menu also provides information about **changes**, showing the Administrator how many and what type of changes have been detected.

New elements appears in **YELLOW**, and changes appears in **GREEN**.

In the example, we can see 2 new hosts and 7 changes detected.

Logout

You can **logout** from the current session by using the button located at top right.
