

Visualisation UI

Innovative and powerful User Interface with customizable dashboards.

It offers an exhaustive and efficient vision of your IT.

This UI improves and simplifies your IT monitoring!

This guide will provide you all the keys to understand the Shinken Enterprise's visualization UI and how to use it.

Let's do it step by step.

Hive

How to customize your monitoring view:

- **Dashboards:** organize monitoring results
- **Widgets:** display monitoring results the way you want
- **Host Detail View :** know everything about an element (host / cluster)

Lists

Everything about elements presented in one list:

- **ALL :** hosts, checks, clusters, all in one!
- **Root Problems :** identify instantly elements to be fixed

Walls

View your key business elements :

- **360 :** 3D representation of your elements
- **Business Apps :** your priorities first !
- **Reporting :** SLA reports of your elements
