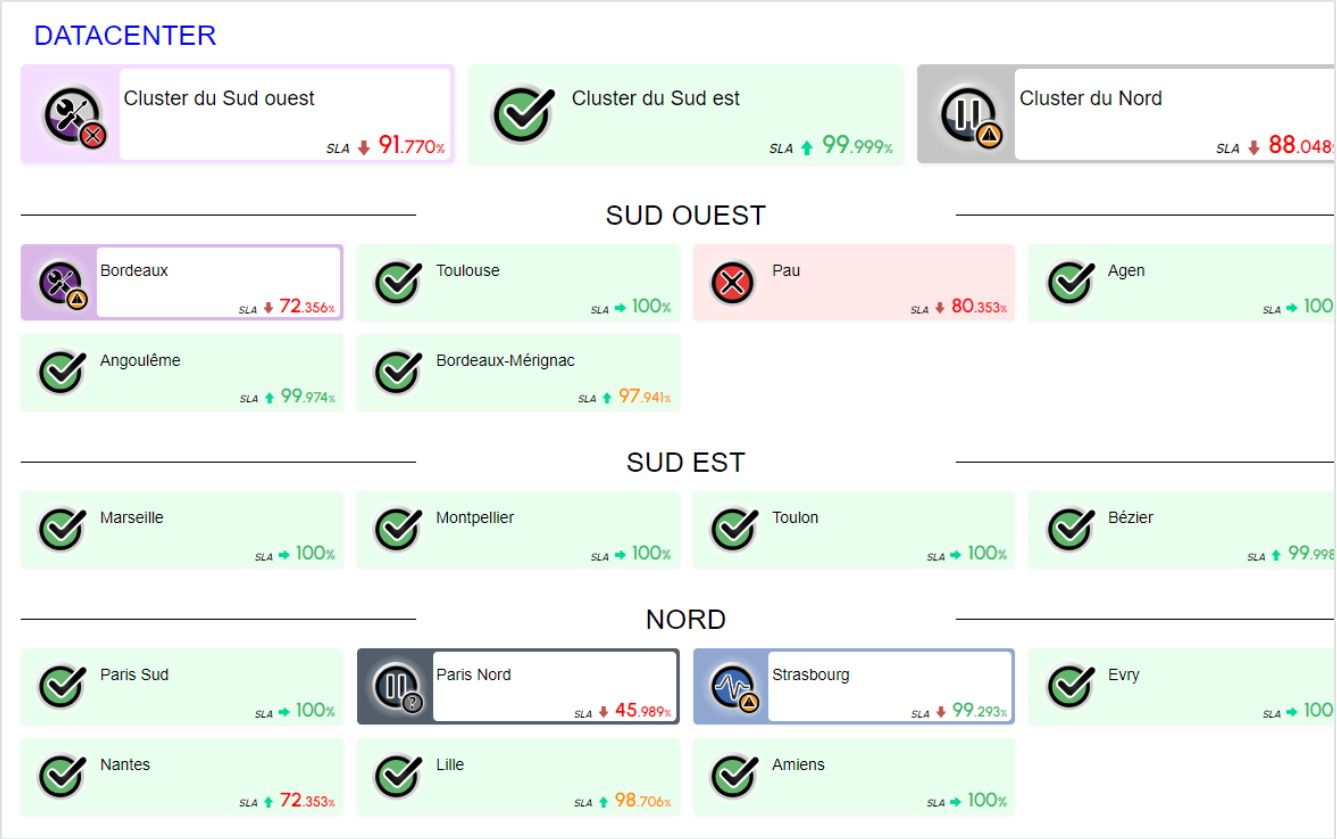
                                }
                        }
                }
        }
}
```



Icône statut puis contexte (*icon_type : status_then_context*)

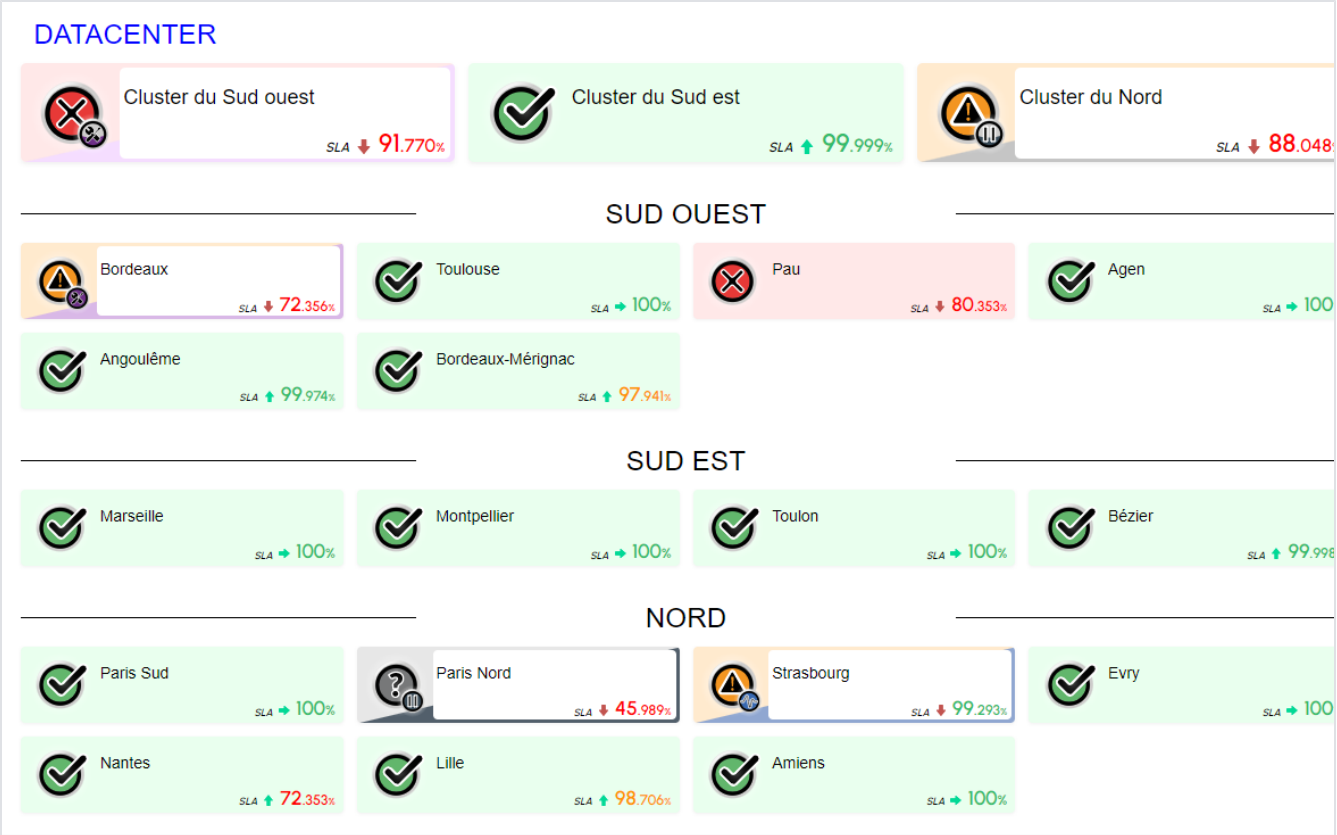
Configuration:

Le statut est mis en avant sur le contexte, la couleur de l'arrière-plan est celle du statut et du contexte (s'il y a un contexte) et la tendance des SLA est activée.

```
"weather_widget_layout": {
        ...
        "content": {
                "layout" : {
                        "background" : "context_and_status",
                         "information_to_display" : {
                                "left_area" : {
                                        "icon_type" : "status_then_context"
                                },
                                 "top_right_area" : {
                                        "displayed" : "default",
                                        "icon_type" : "default"
                                },
                                 "sla_area" : {
                                        "displayed" : true,
                                        "show_icon" : false
                                },
                                "name_area" : {
                                        "property_used_as_name" : "default",
                                        "nb_lines_max" : "default",
                                        "vertical_align" : "default",
                                        "font_zoom_percent" : "default"
                                }
                        }
                }
        }
}
```

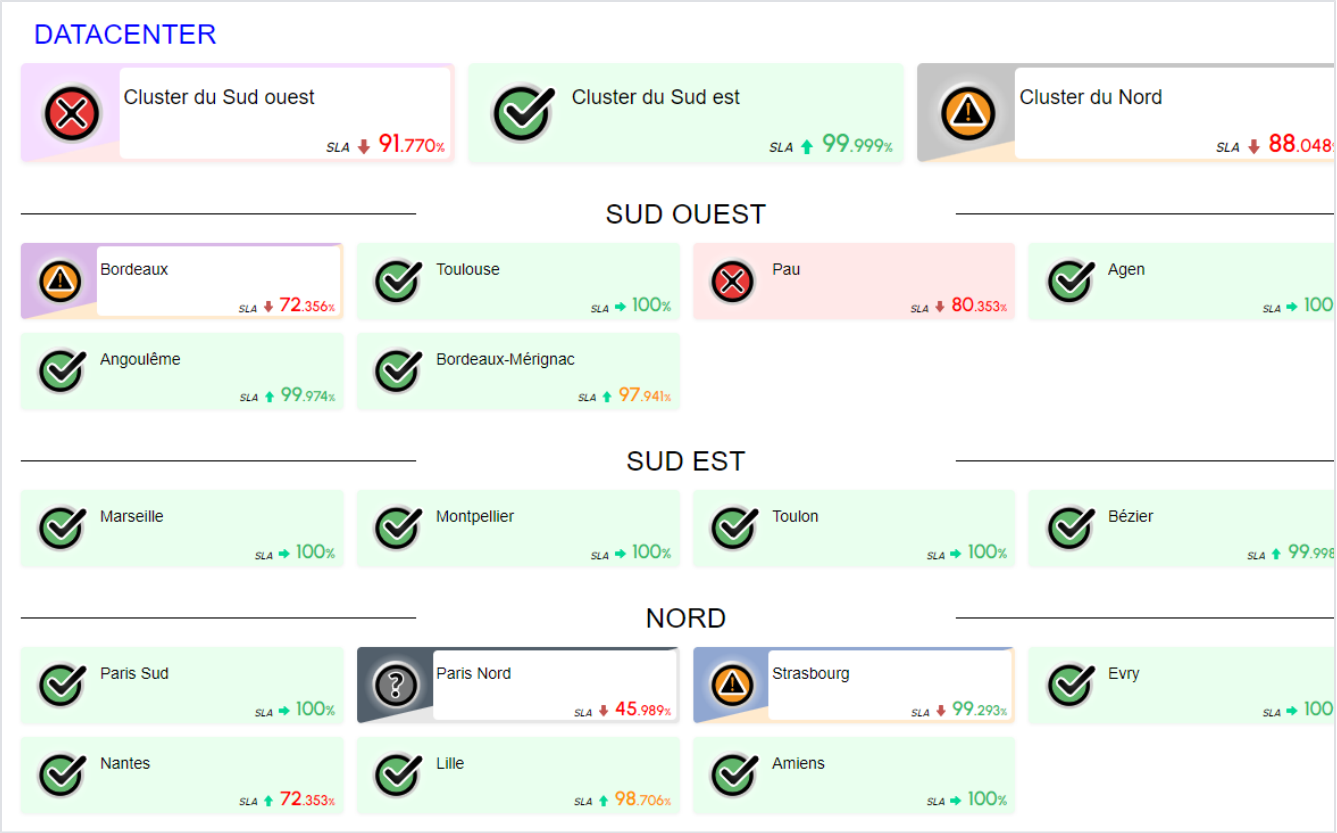


Icône du statut seulement (*icon_type : only_status*)

Configuration:

Seulement le statut est affiché, la couleur de l'arrière-plan est celle du statut et du contexte (*s'il y a un contexte*) et la tendance des SLA est activée.

```
"weather_widget_layout": {
        ...
        "content": {
                "layout" : {
                        "background" : "context_and_status",
                         "information_to_display" : {
                                "left_area" : {
                                        "icon_type" : "only_status"
                                },
                                 "top_right_area" : {
                                        "displayed" : "default",
                                        "icon_type" : "default"
                                },
                                 "sla_area" : {
                                        "displayed" : true,
                                        "show_icon" : false
                                },
                                "name_area" : {
                                        "property_used_as_name" : "default",
                                        "nb_lines_max" : "default",
                                        "vertical_align" : "default",
                                        "font_zoom_percent" : "default"
                                }
                        }
                }
        }
}
```



Couleur de fond du statut uniquement (*background : only_status*)

Icône contexte puis statut (*icon_type : context_then_status*)

```
"weather_widget_layout": {

                }
        }
}
```

Pas d'arrière-plan (*background : no_background*)

Dans ce cas, il n'y aura pas de couleur de background, par contre une bordure sera rajoutée, qui aura la couleur du contexte si existant sinon il aura la couleur du statut.

Icône contexte puis statut (*icon_type : context_then_status*)

```
