

Thank you for using Shinken Enterprise !

Shinken Enterprise is a distributed and a high availability monitoring solution based on Shinken Framework and offering a unified view of your IT.

Shinken Enterprise will allow you to improve your SLA thanks to:

- **Innovative and powerful User Interface** with customizable dashboards.

It offers an exhaustive and efficient vision of your IT.

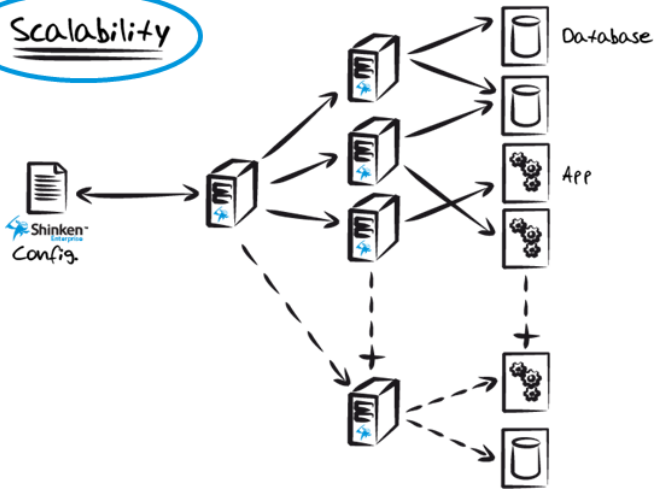

- **Distributed architecture** with high scalability capacities.

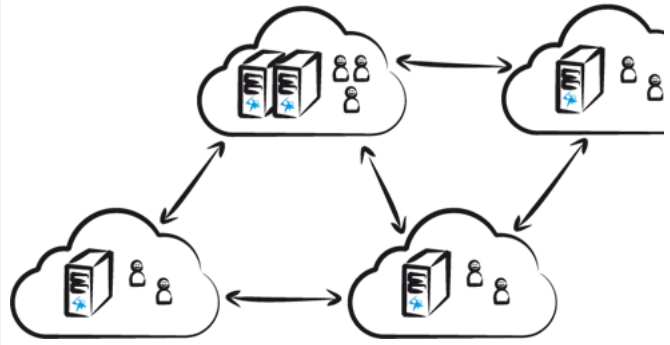

Shinken Enterprise is natively multi-datacenters and multi-teams.

It is easy to add or remove environments.

Scalability

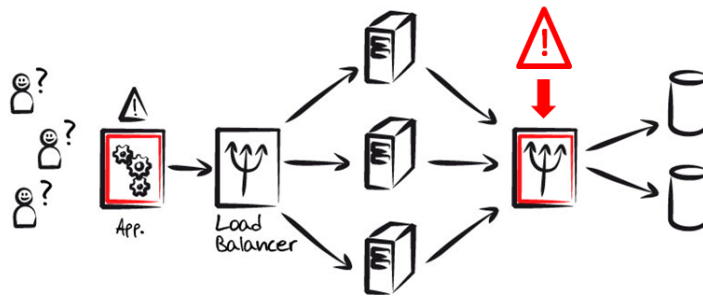

Multi - Datacenters / Multi - Teams

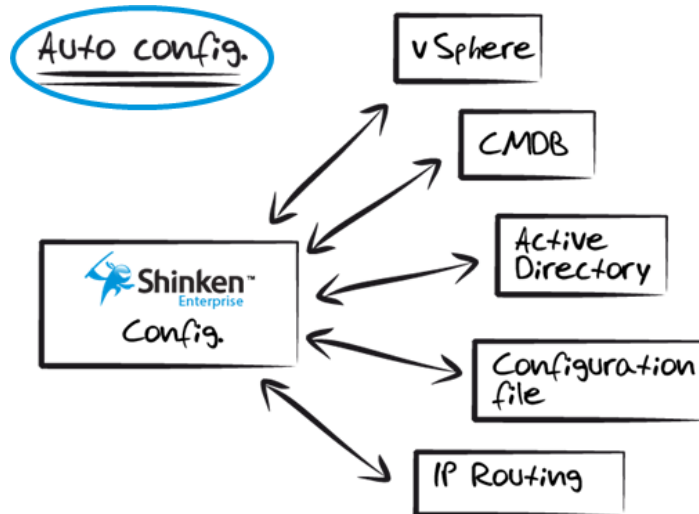

- Strong **correlation** capacity which is the secret weapon for root cause analysis.

Shinken Enterprise is able to know all the dependencies from an application to any element in the IT network.

- **Automated configuration management**

With this one, you will save your time and no more hidden hosts.

With Shinken Enterprise you will guarantee the performances of your IT and the continuity of the business.

Enjoy !
