

Thank you for using Shinken Enterprise !

Shinken Enterprise is a distributed and a high availability monitoring solution based on Shinken Framework and offering a unified view of your IT.

Shinken Enterprise will allow you to improve your SLA thanks to:

- **Innovative and powerful User Interface** with customizable dashboards.

- **Distributed architecture** with high scalability capacities.

Shinken Enterprise is natively multi-datacenters and multi-teams.

It is easy to add or remove environments.

**Table of
contents**

Multi - Datacenters / Multi - Teams

- Strong **correlation** capacity which is the secret weapon for root cause analysis.

Shinken Enterprise is able to know all the dependencies from an application to any element in the IT network.

- Management of the **Configuration Simplified**

Either by Automation

Via data **collectors**, **REST API** or **server analyzer**.

Thanks to these modules, no more host will be hidden.

And/Or per delegation

The configuration **Workflow** allows to delegate hosts configuration directly to IT administrators to avoid requiring everyone to be a supervision expert.

With Shinken Enterprise you will guarantee the performances of your IT and the continuity of the business.

Enjoy !

The Shinken Solutions team
