

# Root Problems

## Overview

This list displays elements that need to be fixed.

The screenshot shows the Shinken monitoring interface. The top navigation bar includes the Shinken logo, a home button, and tabs for 'Hive', 'Lists', and 'Wall'. The main content area displays a table of monitoring elements. The table has columns for Icon, Type, Host, Check, Priority, Tags, Managed By, Context, Status, and Output. The 'Status' column shows various states: 'DOWN' (indicated by a red 'X' icon) and 'CRITICAL' (indicated by a red 'X' icon). The 'Output' column provides details for failed checks, such as 'check\_icmp: Failed to resolve oracle-bad-1' and 'check\_icmp: Failed to resolve srv-apache-1'. Some checks are also marked as 'FLAPPING' with a blue circular icon. The table lists several hosts (e.g., srv-oracle-1, srv-apache-1, ForTestOnly, srv-dba2, srv-dba3, srv-dba4) and checks (e.g., nginx-1, shinken-server, srv-dba1, srv-http-1, srv-http-2, srv-http-3, srv-mongo-1, srv-mongo-2).
