

Access the interface

To access the Interface, you must point your Web Browser to the URL provided during installation.

By default the Configuration Tool is accessible on the dedicated port 7766 (HTTP). For example : <http://172.16.1.130:7766>

HTTPS

The UI can be now protected by an HTTPS access

- The file `/etc/shinken/modules/webui.cfg` has new parameters.
 - to activate the HTTPS: `http_use_ssl=0`
 - by default it is set to 0.
 - Set it to 1 to activate.
 - to set certificates by updating the 3 following parameters:
 - `http_ssl_cert=/etc/shinken/certs/server.cert`
 - `http_ssl_key=/etc/shinken/certs/server.key`

Accessing to the UI will still use the default dedicated port 7766 (HTTP).

- For example : <https://172.16.1.130:7766>

Log in to the configuration tool

You must Sign in to access the Administration Tool :

? Unknown Attachment

1. Enter your **Username** and **Password**
2. Click the **Login** Button or hit **Enter**

 If an error occurred (wrong login or password), you will be prompted again

 If Shinken is connected to an active directory, please use your usual account
