		Context	Status	Type	Name (Host/Cluster)	Check Name	Description	Address	Priority	Realm	Output	Host/Cluster Templates	Host Groups
		Nothing select	Nothing select	Nothing select	Type a name	Type a check name	Type one description	Type an address	Nothing select	Nothing select	Type some text	Nothing selected	Nothing selected
		Nothing select	Nothing select	Nothing select	Type a name	Type a check name	Type one description	Type an address	Nothing select	Nothing select	Type some text	Nothing selected	Nothing selected

Create a filter on a column

By typing a text

Some columns such as "Result" and "Long results" can contain any content and only a text box allows you to filter what you want:

- (1) Type the word you are looking for.
- (2) Press enter.

By a Selection

- (1) Click on the field to display the list of possible values.
- (2) Select one or more values.

or

- Click on the button  *Tout cocher* to select all values.

Example:

List of possible values in the context column:

Select All

Deselect All

OK

Warning

Critical

Unknown

By defining a duration

Some columns such as "Last check" may contain dates . The duration filter will allow you to display only those elements that have a date that is either less or greater (depending on the type of filter desired) than the duration of the filter..

For example, if the filter is "**Newer than 1 min**" then only items with a date less than or equal to 1 min will be displayed..

Example:

Last Change	Last Check	Next
Nothing selected	Newer than 12 minutes	Nothing selected
Nothing selected	Newer than 12 min	Nothing selected
21 minutes 41 seconds ago	44 seconds ago	in 15 seconds

To make a filter on a time column:

- (1) The filter type must be selected as either "**Older than**" or "**Newer than**".
For columns with dates in the future the filter types are "**In less than**" or "**In more than**".
- (2) Then enter the desired duration of the filter in the text field.
- (3) Then choose the type of duration you want (minutes, hours, days, weeks or months).
- (4) Finally, validate the selection by clicking on the validation tick on the right or by pressing the "enter" key..

Delete the filter on a column

Of Text type

- (1) Delete the old search word.

(2) Press enter.

or

- Click on the icon to delete the old search word and reload the list.

Of Selection type

(1) Click on the field to display the list of possible values.

(2) Click on the field to deselect.

or

Click on the icon to deselect all fields.

Of Duration type

(1) Delete the old value.

(2) Press enter

or

Click on the icon to delete the old entry.

Add a filter line

- Click on the button to create a new filter line.

	Add a new filter row	test	Status	Type	Name (Host/Cluster)	Check Name	Description	Address	Priority	Realm	Output	Host/Cluster Templates	Host Groups
		Nothing select	Nothing select	Host	Type a name	Type a check name	Type one description	Type an address	Nothing select	Nothing select	Type some text	Nothing selected	Nothing selected
		Nothing select	Nothing select	Nothing select	Type a name	Type a check name	Type one description	Type an address	Nothing select	Nothing select	Type some text	Nothing selected	Nothing selected
		Nothing select	Nothing select	Nothing select	Type a name	Type a check name	Type one description	Type an address	Nothing select	Nothing select	Type some text	Nothing selected	Nothing selected
			Host	MASTER 1	MASTER 1	localhost	***	All	PING OK - Packet loss = 0%, RTA = 0.02 ms	shinken-arbiter			

Remove a filter line

- Click on the button to remove the corresponding filter line.

Delete all filters

- Click on the button to remove all filters.

 You will not be asked for a confirmation message.

 Remember to save the list to keep the settings.
